

Juan Camilo Rivera Rodríguez

Unity Game Developer

+57 322-908-1561 | juancamilo7151@gmail.com | [LinkedIn](#) | [Itch.io](#) | [Behance](#)

Bogotá D.C., Colombia

Game Development Technologist with experience developing and programming Unity projects using C#. Skilled in multiplayer game development with Photon Fusion, mobile app development in Java using Android Studio, and metrics analysis and data reporting across AdMob, Play Console, and Firebase. I am passionate about building and solving engaging, enjoyable game mechanics. I bring strong teamwork, resilience, and attention to detail, and aim to help build a creative, healthy environment that supports both individual and collective growth.

EDUCATION

Generation Colombia, Bogotá D.C., Colombia

August 2024 / December 2024

Junior Unity Developer

SENA, Bogotá D.C., Colombia

August 2021 / September 2022

Game Development Technologist

WORK EXPERIENCE

Bacon Games, Bogotá D.C., Colombia

January 2025 / Present

Game Developer

- Led the development of the metagame and user interface components for Barknito, an augmented reality (AR) app designed around activities between users and their dogs to support responsible, effective, and enjoyable canine training.
- Developed and established the foundations for most gameplay systems in Panic Shift, a multiplayer mobile prototype inspired by games such as Dead by Daylight and Among Us, ensuring a solid foundation for the product.
- Ensured the correct implementation and operation of the full multiplayer ecosystem within the Panic Shift prototype using Photon Fusion services.

Toy Cantando S.A.S., Bogotá D.C., Colombia

February 2023 / November 2024

Application Developer

- Contributed to restructuring the graphical interface and gameplay systems for the Pin Pon Educational Games app, improving performance by 30% and reducing server bandwidth costs by 60%.
- Conducted testing and bug analysis across all company applications, reducing technical issues by 75%.

Timba S.A.S., Bogotá D.C., Colombia

March 2022 / September 2022

Game Development Intern

- Actively collaborated on planning and developing the camera movement system for the combat arena in Sacred Tales, contributing to a 15% reduction in camera-adjustment time during testing.

PROJECTS

Game Jam Plus, Bogotá D.C., Colombia

October 2023 / April 2024

Utopology

- Contributed to 100% of the ideation and programming processes for all systems and mechanics in Utopology, a resource-management and environmental decision-making video game. Project link: [Utopology](#).
