EXPERIENCE

Game Developer

Bacon Games

01/2025 - 10/2026 | Bogotá D.C, Colombia

- Led the development of the metagame, user interface components, and backend systems integration for Barknito, an augmented reality (AR) application designed around interactive activities between users and their dogs to promote responsible, effective, and enjoyable dog training. I also implemented user data management and features such as in-game currency and leaderboards using Beamable and MongoDB, leveraging document-based data storage on the backend.
- Developed and established the foundations for most gameplay systems in Panic Shift,a multiplayer mobile prototype inspired by games such as Dead by Daylight and Among Us, ensuring a solid foundation for the product.
- Ensured the correct implementation and operation of the full multiplayer ecosystem within the Panic Shift prototype using Photon Fusion services.

Application Developer

Toy Cantando S.A.S

02/2023 - 11/2024 | Bogotá D.C, Colombia

- Contributed to restructuring the graphical interface and gameplay systems for the Pin Pon Educational Games app, improving performance by 30% and reducing server bandwidth costs by 60%.
- Conducted testing and bug analysis across all company applications, reducing technical issues by 75%.
- Facilitated communication between development and marketing teams, improving project transparency.

Game Developer Intern

Timba Games

03/2022 - 10/2022 | Bogotá D.C, Colombia

- Actively collaborated on planning and developing the camera movement system for the combat arena in Sacred Tales, a multiplayer tactical battle game, contributing to a 15% reduction in camera-adjustment time during testing.
- Contributed to the implementation of each Shinsei (combat creature), ensuring that materials, visual effects, and animations were properly organized and categorized in accordance with the project's guidelines.

EDUCATION

Junior Unity Developer

Generation Colombia

08/2024 - 12/2024 | Bogotá D.C, Colombia

Game Development Technologist

SENA

08/2021 - 10/2022 | Bogotá D.C, Colombia

SUMMARY

Game Development Technologist with experience developing and programming Unity projects using C#. Skilled in multiplayer game development with Photon Fusion, mobile app development in Java using Android Studio, and metrics analysis and data reporting across AdMob, Play Console, and Firebase. I am passionate about building and solving engaging, enjoyable game mechanics. I bring strong teamwork, resilience, and attention to detail, and aim to help build a creative, healthy environment that supports both individual and collective growth.
